Dear Ms. Warfel,

While it is not clear whether further endorsements of Dr. Hamilton's request are at all necessary, I am writing at his suggestion. His comments regarding the social problems created in California by some advocates for restriction of medical practice are factual, and we are grateful for any assistance that can be given in altering the laws recently approved in that State.

Dr. Hamilton has been an active advocate of freedom of choice in medical practice. Any help you can give him will be appreciated.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
