Dr. Cosimo Ajmone Marsan
N.I.N.D.B.
National Institutes of Health
Bethesda 14, Maryland

Dear Dr. Marsan:

The American College of Neuropsychopharmacology has established a number of study sections including the one on "The Effects Of Drugs On Electrical Activity Of The Brain". Following the first session of that section in Washington in January, a second meeting was held at the Federation meetings. I have been requested to organize a third session during the meetings of the EEG Society. I am writing to you, and to Dr. Joynt, to request your cooperation so that this session can be held with a minimum of conflict with the EEG program.

If the general outlines of the EEG Society programs are already established, I should like to know if this study group could meet Monday afternoon (October 7, 1963) or, that evening? In the event that either of these meetings would provide minimum conflict, I should like to write directly to the hotel to arrange for a room and then send out letters of invitation to the ACNP members.

Thank you for your cooperation.

Sincerely yours,

Max Fink, M. D.
Co-chairman, Study Section III, ACNP
