Dr. Stanley F. Yolles
Executive Director
National Institutes of Health
5454 Wisconsin
Chevy Chase, Maryland

Dear Dr. Yolles:

I want to tell you how much I enjoyed the talks, both in New York and Washington.

As I discussed with you, I am enclosing a copy of the present marijuana procurement procedures as sent to me by Dr. John A. Scigliano. While we will attempt to comply with these requirements, I think it would be useful to make the procedures less onerous. Surely, marijuana and THC cannot be so dangerous that the procedures should be significantly different than the testing of investigational drugs.

Any assistance you can give to make marijuana or THC available for study at this institution under our present grant MH-13358 (EEG and Human Psychopharmacology) will be appreciated.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
