Dear Julien,

Enclosed, after much delay, is our draft report, "Effects of ACTH₄₋₁₀ (Org OI-63) on Quantitative EEG and Memory Function in Normal Male Volunteers" for ~~your~~ consideration for publication in Neuropsychobiology. I regret the delays, but as you will see, the analyses have been most difficult and interesting.

You should also receive parallel reports from Dr. Rhea Dornbush and Dr. Judith Rapaport. Both have studied ACTH₄₋₁₀ and have something to say at this time.

My regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
