

September 13, 1971

Dear Jon,

Enclosed is the third paper for *Seminars in Psychiatry*. Two others are in final typing and should be out by the week-end. One is in fair shape and will have to go through another revision. One paper is still eluding me, and I will try again to extract it from St. Louis.

I have asked three 'experts' to answer our questions. One set is in, the others should follow in a few days.

As I wrote, unfortunately I will be in Europe for 10 days, but should wrap it up within a few days on my return.

I heard that you testified before Congress about the Jaffe bill. If you wish another 'expert' to appear, I'll be glad to do so. I had the opportunity to see him in action with representatives of industry regarding a development of a long-acting antagonist, and was not particularly impressed.

My best regards.

Sincerely yours,

Max Fink, M.D.
