

July 30, 1963

Mr. Bill Nettleton
Tulane University Computing Center
New Orleans, Louisiana

Dear Bill:

I must apologize for the delay in writing you. The last few weeks have been quite busy in exploring the application of the program using our 1710 system. First, let me thank you for permitting us to work with one of your samples (and also for your program logic).

I wrote to Neil yesterday, including our comments on the problems of period analysis and I am taking the liberty of enclosing the carbon for you.

My best regards.

Sincerely yours,

Max Fink, M. D.
Director
