

October 30th, 1972

DECUS,
Digital Equipment Corp.,
Maynard, Mass.

Gentlemen,

At the recent American EEG Society meetings, programs for the portrayal of consecutive changes in EEG power spectra were discussed by Reginald Bickford of LaJolla. We have a PDP-12 available to us for our EEG analyses and in enquiring of your representative as to the availability of the programs, submitted by Bickford to DECUS, he suggested I write directly.

Is the plot portrayal of power spectral arrays, yielding a 3-dimensional image for changes in time, available through DECUS? What is its number and how can a copy be obtained?

Many thanks,

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
