Mr. Donald B. Cheetham, Jr.
Research Associate
Clinical Investigation Department
Smith Kline & French Laboratories
1500 Spring Garden Street
Philadelphia, Pennsylvania 19101

Dear Don,

Enclosed are ten copies of a preliminary draft of our progress report No. 3 on the comparison of the EEG effects of amobarbital, dextroamphetamine and placebo in volunteer subjects. We are including some of the data tables, to give you an idea of the material with which we worked. We will bring with us additional material which will serve to amplify these data.

I look forward to joining you in Philadelphia on Wednesday afternoon, June 14. Dr. Shapiro and I will be leaving New York in time to arrive at 1:00 p.m. We look forward to visiting with you.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
