Dr. G. Verdeaux,  
Laboratoire D'Electro-Encéphalographie  
Centre Psychiatrique Sainte-Anne  
1, Rue Cabanis, Paris-XIV  
France

Dear George,

Your suggesting regarding Dr. Kugler is indeed a good one. Because of the difficulties in organization so far, it is unlikely that any formal meeting can be arranged. I would, however, be interested in an informal gathering of all workers interested in EEG. Such a meeting could be arranged late in the afternoon, or during a free evening. It would be possible to identify the workers in the field, get to know their interests, and determine if there is sufficient interest for a meeting on this subject either at the next CIMP or at the International EEG in Vienna.

Would you write to Dr. Kugler to suggest he discuss this with Dr. Bente and make the local arrangements. An announcement can then be printed in the CIMP program or a mimeographed invitation placed in the program at the time of registration.

I am looking forward to our meeting in Munich, and extend to you and your wife, my best wishes.

Sincerely yours,

MF:dts
