Dr. Nathan S. Kline
Director of Research
Rockland State Hospital
Orangeburg, New York

Dear Nate,

It has taken many years to develop a usable EEG predictor model for novel psychoactive drugs. The enclosed reports of cyclazocine as an antidepressant have been submitted for publication. Knowing of your interest and enthusiasm for new drug evaluations, perhaps these experiences may suggest similar experiments with other novel compounds.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
