Dear Sir:

We are pleased to submit the report "Family Aspects in the Prognosis of Schizophrenia" for your consideration for publication in the journal *Family Process*. This review was prepared as part of an evaluation of social and family factors in the prolonged hospitalization of the severe mentally ill.

If the report is of interest, we will be pleased to redraft the citations to meet your editorial style.

Thank you for your consideration.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
