Mr. J. Haller
Efringerstrasse 73
CH-4057 Basel, Switzerland

Dear Mr. Haller,

We do not ordinarily have funds for post-doctoral candidates in our program, except for physicians who are completing their psychiatric residency training. I regret that we are unable to fund a position. We have, however, from time to time, made the facilities of the laboratory available to candidates interested in examining a problem for which these laboratories seem particularly well suited. Our work is exclusively with normal human volunteers, almost always male, and we are equipped to examine the EEG effects of psychoactive drugs (or any other perturbation of the central nervous system) both on acute and long term administrations. While our studies are in alert subjects, others at this University are exploring similar problems in the sleeping volunteer. Should any of these facilities be of use to you, let me know the project problem and if we can be of assistance, we will.

Thank you for your inquiry.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
