Dr. Craig D. Burrell  
Medical Services Director  
Sandoz Pharmaceuticals  
Hanover, New Jersey 07936

Dear Dr. Burrell:

I am returning the hematocrit data sheets marked correctly. "Drug VI" does not, of course, exist and represents a typographical error for Drug IV. Drug II is the placebo period and it was the reporters enthusiasm in adding the word placebo after the second Drug II.

We have read Dr. Wendkos' remarks with great interest. I would be pleased to meet Mr. Hamot and will discuss the project with him.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
