

April 1, 1964

Dr. George A. Ulett, Director
Attention: Mr. C. P. Weidenthaler
Division of Mental Diseases of Missouri
722 Jefferson
Jefferson City, Missouri

Dear Mr. Weidenthaler:

I would be pleased to have you submit the enclosed application for examination for the position of Associate Research Scientist (Pharmacology) of Dr. Bernard Korol to the Personnel Division.

Dr. Korol is an outstanding scientist with extensive research experience and many publications.

Many of the compounds now in use in the treatment of psychiatric illnesses have widespread effects on the autonomic nervous system and the cardiovascular systems of the body.

Dr. Korol is exceptionally well qualified in the studies of these systems and we are delighted to have him join the staff to complement our research programs. The application of his special interests in the mental health field is urgently needed. Perhaps more important is the fact that for the past three years he has been an active participant in the research programs of the Geigy Pharmaceutical Corporation, an organization which has produced a variety of excellent psychotropic compounds, the most outstanding of which is imipramine.

Thank you very much for your help.

Sincerely yours,

Max Fink, M. D.
Director
