

7: Letters

May 28, 1964

Dr. Alvin Goldstein  
Department of Psychology  
University of Missouri  
Columbia, Missouri

Dear Dr. Goldstein:

Recently, Dick Cravens suggested that we may have a common interest in our EEG analyses and suggested it may be helpful for us to get together. I recollect visiting with you at the time last year when I made a tour of Bob Daniel's laboratory. Since then, our own EEG facility and our psychology laboratories have grown rather rapidly and I would like to take this opportunity to extend an invitation for you to visit with us, the next time you are in St. Louis. Is it possible that you will be in this city some time in the next few weeks?

Sincerely yours,

Max Fink, M. D.  
Director
