

March 14, 1969

Dr. Jack Peter Green
Chairman, Department of Pharmacology
Mt. Sinai School of Medicine
New York, New York

Dear Dr. Green:

Both Dr. Shapiro and I very much enjoyed our meeting with you. Perhaps there will be programs of common interest and I hope that we can work together when necessary.

I am enclosing some of the most recent reprints from this laboratory. If the problem of anticholinergic drugs is of particular interest, may I recommend Volume 28 of *Progress in Brain Research, Anticholinergic Hallucinogens*, which I edited with Dr. Bradley. This volume contains additional reports especially focussed on this startling group of hallucinogens.

I will be pleased to show you through our laboratories at your convenience.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
