J. R. Wittenborn, Ph.D.
Director-Interdisciplinary Research Center
Rutgers-The State University
New Brunswick, New Jersey

Dear John:

The Study Group III: Biological Effects of Pharmaceutical Agents - Neurophysiological Aspects at its meeting on January 16th designated a new troika leadership for the coming year.

Drs. C. Shagass and D. Goldman as Co-Chairmen
Dr. W. Koella as Secretary

In addition, Dr. Toman and I had invited Dr. Turan Itil as consultant to the Group and as a formal discussant of Dr. Shagass' report. Dr. Itil is preparing his comments for publication, and these will be submitted to Dr. Cole shortly. An account of his expenses is enclosed, and are recommended for reimbursement.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
