

July 1, 1971

Dr. Henry Brill
Pilgrim State Hospital
Brentwood, New York

Dear Henry,

I am pleased to enclose a summary of my report of my visit to the University of the West Indies, and my letter to Dr. Beaubrum, suggesting a collaborative study in the winter of 1972.

Should he concur in the recommendations, I should like to call on the Marijuana Commission for support, particularly if it may be useful to do the study promptly.

I told Dr. Beaubrum of your interest in cannabis research, and your central role in our study in Athens, and he expressed an interest in meeting you in Jamaica this winter.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
