Charles D. Willis, M.D.  
5254 North Del Mar  
Fresno, California

Dear Dr. Willis:

In response to your letter of July 28, wherein you requested copies of articles describing our work with computer analysis of the EEG, we are pleased to enclose the following:

Application of the IBM 1710 Control System to EEG  
Analysis, by D. M. Shapiro;

Digital Computer Analysis of EEG Using an IBM 1710  
System, by Max Fink, M.D., Don M. Shapiro, David  
Bridger and Turan Itil, M.D.

EEG Analysis using an IBM Control System, by Donald  
Shapiro, David Bridger and Max Fink, M.D.

Our equipment is described in detail in the above articles. The IBM equipment is under contract through the Washington University Computer Center who, in turn, leases it from the IBM Corporation. The Calcomp computer was purchased directly from the Calcomp Corporation, whose main offices are in California.

We trust the above will be of help to you.

Very truly yours,

Max Fink, M.D.  
Director
