Dear Sir:

Dr. Aubrey Goodman has brought his report on Lomotil in the treatment of narcotic withdrawal to our attention. This laboratory is specifically interested in the treatment of addicts, and we would be grateful for copies of such general reports as may be available, as well as citations to reports in the literature.

Is the IND still active, and have any other reports of its use in narcotic addiction been published?

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
