

October 19, 1964

Dr. Leo Alexander  
433 Marlborough Street  
Boston 15, Massachusetts

Dear Leo:

I am pleased to propose Dr. F. Flugel, Professor of Psychiatry and Neurology, Chairman, Department of Neuropsychiatry of the University of Erlangen-Nürnberg, Germany for membership in the Society of Biological Psychiatry.

I have known Dr. Flugel since 1958 at the convocation of the C.I.N.P. at Rome. At that time I found that both he and his assistants, Dr. Itil and Bente, were actively involved in psychotropic drug research. I found them most interested in the relationship of brain function and behavior. Indeed, Dr. Itil has joined our Institute from Dr. Flugel's staff.

I would be pleased to have Dr. Flugel a member of the Society of Biological Psychiatry and look forward to having him participate in the meetings of the Society when membership is accorded him. I believe that we can do much to stimulate his attending, despite the distances involved.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Director
