Dear Rich,

Don may have told you that we are planning to put on a demonstration of some of our library and other programs at the forthcoming World Congress of Psychiatry in Madrid. I will need two disks. I have called IBM and they will do their best to make these available by the end of the month for this special purpose. If the disks and programs are available by the first week in July, I can arrange to have them shipped from New York with the other equipment going to the World Congress.

Please confirm the rental of two disks for approximately a four month period and charge to the University of Missouri.

Many thanks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
