

December 11, 1968

Dr. Leon Hellman
Montefiore Hospital
210 Bainbridge Ave.
Bronx, New York

Dear Leon,

As I discussed with you, I am enclosing a paper "Newborn Sex Ratios Associated with Pre- and Post- Partum Process Schizophrenia" written by Dr. Taylor who is one of our third year residents. The problem is either a very important one, as I think it is, or an interesting footnote.

I would be pleased if you and Dr. Gallagher would read this and I would like to arrange an opportunity for us to get together to discuss this further. Please call me as soon as you have had a chance to read this report.

The report has been submitted to *Science* and until it has been accepted for publication, I would ask you to use your greatest discretion in discussing this report.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
