Paris (13<sup>e</sup>), France

Dear Pierre,

Thank you for the articles on sulpiride. These were most helpful, and as you suggest, the data is indeed unimpressive. An EEG profile analysis would not be sufficiently helpful to reply the expense and effort.

For the CIMP in Copenhagen, I hope the Program Committee will restrain the chairman to, at most, two parallel sessions!

Many, many thanks for your kindness in sending the articles.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
