Philadelphia, Pennsylvania 19104

Dear Karl,

Following the suggestion of a staff member who heard that the maximum clinical dosage of Librium was 40-50 mg/day, we instituted a review of our experiences here. It was obvious that our staff uses higher dosages in our Mental Health Clinic.

Before submitting this for publication, I would appreciate your comment, from your experiences with anti-anxiety, whether this presentation has any merit.

Many thanks and my best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
