New York, New York

Dear Mrs. Kahn:

Enclosed is the reprint you requested. I am also sending you a preprint of the very high dose fluphenazine study. If this interests you it may also interest your readers, not only as a statement of treatment efficacy, but also as an example of the impact of present governmental regulations on American drug research. We found it difficult to undertake these trials here and elected to carry out the study in Istanbul.

We now have more extensive follow-up data and it is even more rewarding than the initial evaluations.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
