Denver, Colorado 80220

Dear Dave,

Enclosed is an abstract for your consideration for the 1971 Annual Meeting of the American EEG Society. I am not confident that this application of quantitative EEG is sufficiently "basic" to interest the members, but it is a reflection of the progress made in the quantification of the EEG.

Perhaps a workshop on present applications of quantitative EEG may be useful.

It was fun in Aspen.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
