Dear Sir:

Your advertisement in a recent issue of *Science* regarding a wish for an appointment as biostatistician is of interest to us. The Department of Psychiatry of the New York Medical College has recently embarked on an intensive study program of the effects of changes in EEG signals in relation to changes in behavior induced by psychoactive drugs in mental patients and narcotic addicts. The laboratory is equipped with an IBM 1800 system and we are anxious to expand the statistical approaches necessary in the analysis of these signals.

The appointment is in the Department of Psychiatry and would encompass consultation in psychopharmacology studies, evaluations of treatment, and other related applications.

If this appointment interests you, I would appreciate receiving a copy of your curriculum vitae.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
