

October 25, 1962

The specific tasks are:

Johns Hopkins' scale - each item score pre and post by subject.

Lorr Ward scale - each item pre and post.

Lorr interview scale.

Here you have two scores, by Don and myself following the dictum that we should make as few sums as possible, it will be helpful if we were to punch the forty items for each examiner separately pre and post for each subject.

I think these three scales are more than enough to give us a picture of the factorial dimensions for this population. I have the facilities to have these scores punched here and shall send you both the cards and our analyses when they are done.

It was nice chatting with you again.

Sincerely yours,

MISSOURI INSTITUTE OF PSYCHIATRY

Max Fink, M. D.
