Dr. Roy R. Grinker, Chief Editor  
Psychosomatic and Psychiatric Institute  
2959 South Ellis Avenue  
Chicago, Illinois 60616

Dear Mr. Grinker:

Enclosed is a report "Long-Acting, Depot Phenothiazine Treatment of Psychosis" for your consideration for publication in the *Archives of General Psychiatry*. In our studies of the severe, long-term chronic mentally ill we have found the parenteral phenothiazine most helpful in the treatment and maintenance of these patients, and this usefulness has stimulated us to prepare this report.

Thank you for your consideration.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
