Dr. Al Kurland
Spring Grove State Hospital
Baltimore, Maryland

Dear Al:

Martha and I were very pleased to receive the travel literature of the Medical Society of Maryland, which Mrs. Wolins was kind enough to send us at your request. The trip is indeed an interesting one and would be a considerable saving in time and money. I do not think, however, that we can take advantage of this since it will bring Martha back to the United States too late to begin her new position. I am delighted that she has received an appointment in our school district as a first grade teacher. School starts for her on August 30, and we cannot see her coming home to start school late. Not on the first day of her first major job!

It was a pleasure being with you in New York. My best regards.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
