Dr. R. D. Roecker, Chairman  
Psychiatric Section  
Overlook Hospital  
Summit, New Jersey 07901

Dear Dr. Roecker:

Electroshock therapy is a standard procedure in the in-patient service of this hospital. At the present time anesthesia is administered by an anesthesiologist.

This is a community hospital and there are no specific charges for these services.

Psychiatrists occasionally administer their own anesthesia and the only qualification required is that he be board certified in psychiatry, a license from the State of New York and the willingness to undertake the treatment.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
