

February 12, 1965

Dr. Milton Tarlau  
Secretary-Treasurer  
EAEEG  
80-02 Kew Gardens Road  
Kew Gardens 15, New York

Dear Milt:

It is with great pleasure that I submit the application for membership in the Eastern Association of Electroencephalographers of my co-worker, Turan Itil, M.D.

Since 1958, I have followed his work with a great deal of interest, and encouraged him to come to the United States and join me in my studies. He is an active worker, and has published extensively in electroencephalography and psychopharmacology. He has recently published a monograph on the EEG changes in psychotic patients with various psychotropic drugs, with specific emphasis on the pentothal response.

At the present time, he is Associate Professor in the Department of Psychiatry, and Chief of the Section of Clinical Neurophysiology and Electroencephalography of this Institute. A second letter of recommendation will be submitted separately.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
