Dr. Neil R. Burch  
Houston State Psychiatric Institute  
1300 Moursund Avenue  
Houston, Texas

Dear Neil:

It has been many months since we chatted. Our programs have been running quite well, and we have just completed the data collection phase of our first computer-EEG study. As you know, we will try to compare the pentothal effect using period analysis, power spectrum and a random shapes program.

I am writing to inquire as to the EEG records I sent you many months ago. The technician here has just sent me a note saying that I never returned them to her. Would you ask your technician to see if that box is in one of the corners of his room, and if so, would you have him ship them back to us?

I am looking forward to seeing you in Los Angeles. Given the opportunity, I hope to visit the Brain Research Institute, and for this reason am planning to go to L.A. before the Biological Psychiatry group meets. I will be there on Friday, May 1. By any chance, would you be visiting the Institute? If so, I can know no better guide than to come along with you, if that is at all proper or feasible.

My best regards.

Sincerely yours,

Max Fink, M. D.  
Director
