Boston, Massachusetts 02124

Dear Jon,

I am pleased to enclose 3 copies of our report, "EEG Profiles of Fenfluramine, Amobarbital and Dextroamphetamine in Normal Volunteers" for your consideration for *Psychopharmacologia*. We have actually carried out more analyses with similar results, so that the details reported here are a part of our data. Nevertheless, the figures (6) may be too many and we can reduce these to 3 (1-3 only) if space is a consideration.

This represents the first of our detailed reports, and I would be honored to have it appear in *Psychopharmacologia*, since without your encouragement, the program would not have developed.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
