Administrative Memo No. 65-2

To: Dr. George A. Ulett

From: Dr. Max Fink

I am pleased to accept the designation as "Head of the Division of Research" within the Department of Psychiatry at the Missouri Institute of Psychiatry. The functions described in the phrases "one that relates to the development of new programs and grant applications" and "one of advising and assisting in the overall department strategy as regards research" and "in the all important area of recruitment" may indeed be important ones and I shall do my best to carry out these functions; hopefully, with as much mutual satisfaction as I carried out the function as Director of the Institute.
