Dear Reg:

Enclosed is a copy of my publication list. As I read the titles, I find that there are fifteen in which EEG data are a major part of the report. Since I do not know the seven that you have found, I am sending the complete list for your use.

Reference No. 78 is our bibliography which is now in press and for which I have already received the proofs. The references are already on cards and I would be glad to send you either a complete deck or a print-out, or if you wish to have this on tape, and supply us with a tape, I will be glad to have it put in tape format. In any case, I believe you would find this collection helpful to round out your Kwic index.

If there is any other way that I may be of help to you, please let me know.

Sincerely yours,

Max Fink, M. D.
