Albert A. Kurland, M.D.  
Director  
Maryland Psychiatric Research Center  
Box 3235  
Baltimore, Maryland 21228

Dear Al:

I regret that I do not know any biochemist of sufficient distinction to recommend for this position. If I were looking for such a person, I would probably call Arnie Friedhoff at New York University or Ed Sacher at the Albert Einstein College of Medicine.

With regard to the ECT project, I would be delighted to read the report before it is submitted.

You may be interested in getting a copy of the newly-issued volume, Psychobiology of Convulsive Therapy, which has just been published by V. H. Winston in Washington.

My best regards,

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
