Mr. Demetri P. Kanellakos
Stanford Research Institute
Menlo Park, California 94025

Dear Mr. Kanellakos,

Thank you for your survey of the literature on "Voluntary Improvement of Individual Performance". It is clear that differences between the measures during TM and other states can be defined but their regularity and significance are yet to be defined.

I found your review most helpful.

Many thanks. If you can, give my regards to Lee Otis.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
