

April 6, 1967

Mr. J. E. McGregor
Personnel Administrator
Control Data Corporation
4201 North Lexington Avenue
Arden Hills, Minnesota 55112

Dear Mr. McGregor:

Mr. David Bridger was on the staff of the Computer Center of the Missouri Institute of Psychiatry early in its development. At the time we were installing an IBM 1710 control system for the analysis of neurophysiological signals. Mr. Bridger had unusual capacity in understanding the equipment and the variety of housekeeping programs. At the time that the first disk file was instituted in St. Louis it was at our installation.

Both in the development of new equipment and in providing programming for some of our projects, I found Mr. Bridger unusually capable. When other systems engineers were unable to make the disk file operate, he was instrumental in providing the necessary programs.

I would recommend him highly for any position which he thinks he is able to fulfill, especially those which required the integration of electronic equipment and programs.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
