30 January 1974

Huntington Mavor, M.D.  
Secretary  
Eastern EEG Society  
Hanover, New Hampshire 03755

Dear Dr. Mavor:

I am writing to recommend Jan Volavka, M.D., for membership in the Eastern EEG Society.

I first met Dr. Volavka in 1968 on the occasion of a visit to his research laboratories in Prague. I invited him and the director of the laboratory, Professor Roubicek, to visit our laboratories at the New York Medical College--an invitation which they both accepted following the unwarranted invasion of Czechoslovakia by the Russians. Dr. Volavka has worked in the laboratories at New York Medical College since 1969 and during this time has been my associate. I left the College in September, 1972, and since that date he has assumed responsibility for ongoing programs in drug dependence and electrophysiology.

He is a well trained and highly experienced investigator with special talents in electrophysiology, statistics, computer processing, and the pharmacology of opiates and cannabis. He was an important contributor to my studies of ECT and the EEG effects of opiates and cannabis.

It is a pleasure to recommend him for membership in the Eastern EEG Society.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
