New Orleans 12, Louisiana

Dear Jim,

As part of our program of data presentation, Don Shapiro and I have recently completed the enclosed review of our experiences and summary of the programs for digital computer analysis of EEG. It gives us great pleasure to send you a copy, knowing that you were kind enough to share your early programs and to provide us with a foothold in what was then a difficult problem. I think the programs are running very well and we have been gratified with some of the data which has been produced during the past few months.

Many thanks for your support.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
