Dear Shelly,

Thank you for thinking of me regarding Dr. Fazio. Since he was invited to the United States by the New York Medical College, I knew of his visit and already had recommended him to my associate, Dr. Turan Itil.

He gave a lecture here on Friday, but unfortunately I was away at a meeting and missed his visit.

As you can tell, we have returned to New York, where I am now re-establishing a clinical research program within an active medical school program. When I went to St. Louis, it was to establish a research laboratory, and this has been accomplished. The invitation to return East was too good, despite the fact that the facilities and opportunities were magnificent.

Thank you very much for thinking of me and I know that Dr. Fazio had a pleasant visit here and hope that he will find my former laboratories interesting.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
