Dear Dick,

I have reread your contribution to the ECT volume. In the context of the two reports by Exner, copies of which are enclosed, it might keep the volume up to date if you would add a postscript, footnote, or a paragraph, placing their work within the context of your review of multiple ECT. We will, of course, add the citations at the appropriate place. If you could do so within the next week, I would be most grateful.

My best regards,

Sincerely yours,

Max Fink, M.D.
