Dear Joe,

Enclosed is a revised chapter, "The Electroencephalogram in Clinical Psychiatry". Your comments were cogent, and I trust I made the changes in a useful fashion.

(3) Table I has been revised. It has been published elsewhere, but this simplified version can be published.

(11) The controversial sections on pages 9 and 10 are deleted. These are useful for the specialist, but may have no place in a textbook.

(14) Unfortunately, there is no good data on the effects of ℓ -Dopa or PCPA on the EEG, and these must be obtained.

Thanks again for the excellent editing.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
