Dr. Alex Karczmar  
Stritch School of Medicine  
Loyola University  
Chicago, Illinois

Dear Alex,

We have been notified by NIMH that our application for supplementary support for the studies of CSP in the ECT process was not accepted.

Dick has sent one sample, and during the past 2 months we have been writing up the results of the first studies and planning the new ones to begin in late September. I do not know what arrangements we can make, but I believe that we will be able to make samples available and hope that we can work something out.

I will call you immediately after my return from summer holidays and we can decide then how to proceed further.

My best regards for a happy summer.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry

P.S. We should have a dinner in Prague, at least !
