

June 23, 1965

Mr. Donald G. Irvine
Research Biochemist
The Saskatchewan Hospital
North Battleford, Canada

Dear Mr. Irvine:

Thank you very much for your letter of June 21. It would indeed be possible for you to visit these laboratories, but the period you suggest in mid-August is a time when both Dr. Itil and I plan to be away. We would be pleased to have you visit these laboratories before the end of July since we plan to leave about the third of August or again after the tenth of September, when we will have returned from some meetings.

Your statement that you are interested in the genetics of EEG patterns is an interesting one. I wonder if you would tell me some more about what you have been doing and if you have any reports concerning your work, both Dr. Itil and I would be pleased to read them.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
