Room 17-91  
Parklawn Building  
5600 Fishers Lane  
Rockville, Maryland 20852

Dear Bert:

In line with the announcement in the APA Monitor, I am pleased to commend Rhea Dornbush, Ph.D. for your consideration for membership in the NIMH advisory boards or study sections. She is an able experimental psychologist, recently recommended by Al Freedman and myself for promotion to Associate Professor.

She has made important contributions to studies of memory function in convulsive therapy and with marijuana; and to the psychological effects of cannabis. For the past year she has been the principal scientist in the overseas study program of chronic hashish users in Greece, and is organizing a study of ganja users in Jamaica.

Her curriculum vitae is attached. I am sure Al Freedman will commend her performance.

My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
