

January 16, 1969

Dr. Gert J. Schuller
Assistant Clinical Research Director
The Squibb Institute for Medical Research
New Brunswick, New Jersey 08903

Dear Dr. Schuller:

Separately I am sending you our file copies of the record abstracts for each case in the fluphenazine decanoate/ enanthate studies; as well as a write-out of the laboratory data.

The individual case records include copies of the summary, rating scales and visit records for each patient in the study.

The laboratory data book contains the actual data reports for each subject, to the extent collected during the study period. The first sheet of the laboratory data report is a copy of our standards and this defines the upper and lower limits for this laboratory.

We would appreciate return of the records as soon as you have completed your review. The laboratory data statements are the originals, run for you, and their return is not necessary.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
