RE: Lithane  
LTR 2/4/72

Dear Alan:

We are most grateful for the supplies of Lithane (lithium carbonate) which you so kindly made available to us in 1970. Since that time we have treated more than 20 patients, mostly those suffering from mania, and the supplies are exhausted.

Early in 1971, Lithane was approved by the formulary committee of Metropolitan Hospital Medical Center for psychiatric use, and is no longer "investigational" and not under our control.

Thank you for your assistance. My best regards.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
